

COMMERCIAL INSURANCE
CONSTRUCTION

There are many risks to a property during the construction phase, which may be complex and large scale.

At SPF, we help our clients identify, manage and control risks in the construction process and deliver value for money, a crucial part of the success of any construction project.

We have access to an extensive number of market contacts to offer tailored insurance solutions that protect your key construction assets, legal liabilities and financial exposures. We can advise on the right type of cover for your particular construction project, including:

- Contract works
- Public and Products Liability
- Construction all risks
- Engineering all risks
- Latent Defects

We work with a panel of leading insurance providers enabling us to negotiate preferential rates that you may not be able to access yourself.

Our team understands the sorts of issues property developers, funders and contractors face and will help you stay protected with the right insurance and advice.
